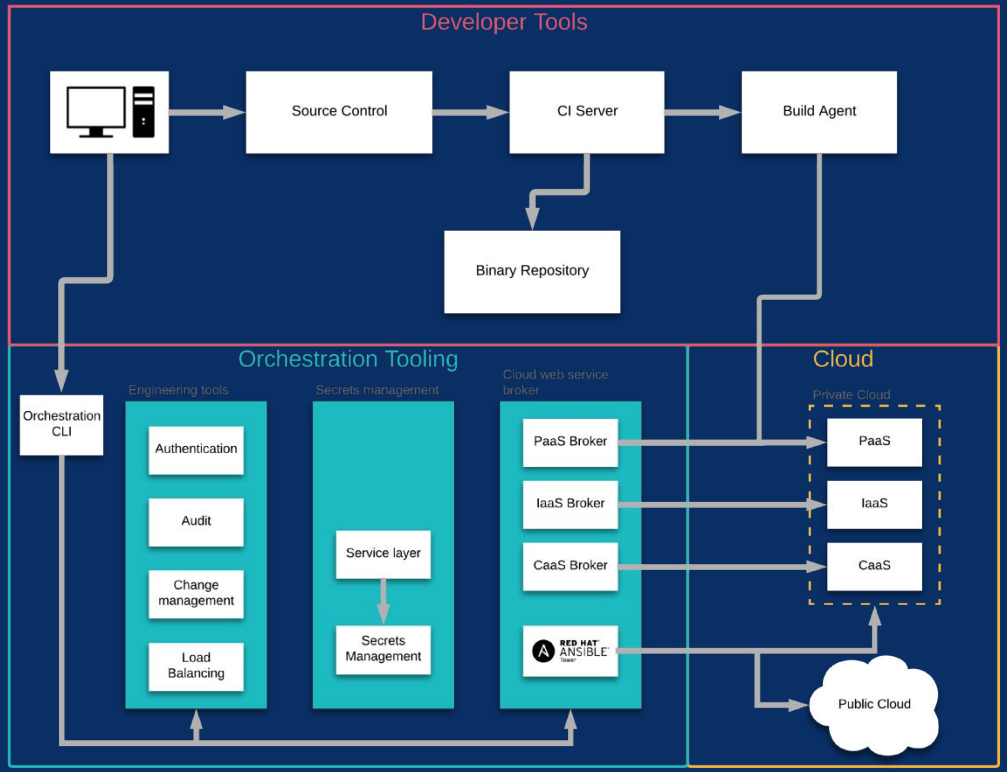
Automation culture: The Ansible way

‘RBS is committed to drive innovation and change by leading development opportunities that push boundaries, whilst creating an exceptional customer experience’

Current state

Enabling a faster pace of change across all teams

- Ansible safely orchestrates shared infrastructure in Public Cloud.
- Huge flexibility for configuration management across numerous products in our stack
- ‘Bring your own playbook’ model for adding capabilities to tooling’



Future state

End to end automation workflow to streamline the development lifecycle

- Ansible powers seamless orchestration across all hosting platforms
- A mature ‘DevOps’ culture through the use of automated processes.
- A self-service ecosystem where we can run at scale.
