Digital Transformation & Innovation with Containers

Graham Berry
EMEA Sales Lead - OpenShift
Why Containers?
Software Disrupts Business

Retail: Amazon, Alibaba
Finance: Square, Apple Pay
Media: Netflix, Spotify
Transportation: Uber, Lyft

??
Creating value depends on your ability to deliver applications faster.

Containers, Kubernetes, and hybrid cloud are key ingredients.
OpenShift is the best platform to deliver container-based applications.
Why is Innovation Important?

If change is happening on the outside faster than on the inside the end is in sight.

Jack Welch, former CEO, GE

S&P company life expectancy
IT Must Evolve to Innovate

Development Process
- Waterfall
- Agile
- DevOps

Application Architecture
- Monolithic
- N-Tier
- Microservices

Deployment & Packaging
- Physical Servers
- Virtual Servers
- Containers

Application Infrastructure

The importance of Developers to the Enterprise
Developers ... Why is this important

“The most successful companies today are those that understand the strategic role that developers will play in their success or failure.

Not just successful technology companies – virtually every company today needs a developer strategy.”

https://thenewkingmakers.com/
"...Transition to software development platforms first, infrastructure second..."
Top Performing Organisations expect to develop 40% of their new mission critical applications in house
DEVELOPERS DRIVE THE PLATFORM

58%

Of developers said they are the primary decision makers

<20%

Of developers said they had little to no influence

Streamlining Application Development with PaaS

Craftwork

How to Build an Application:

1. Have idea
2. Get budget
3. Submit hardware acquisition request
4. Wait
5. Get hardware
6. Deploy framework/appserver
7. Deploy testing tools
8. Test testing tools
9. Code
10. Configure production servers
11. Push to production
12. Launch
13. Order more servers to meet demand
14. Wait
15. Deploy new servers
16. Perform additional steps as required

Assembly Line

How to Build an Application with PaaS:

1. Have idea
2. Get budget
3. Code
4. Test
5. Launch
6. Automatically scale
OpenShift enables developer productivity

- Self-service provisioning
- Consistent environments
- Automated build & deploy
- CI/CD pipelines
- Configuration management
- App logs & metrics

Building next-gen applications

OpenShift Service Mesh
- Integrated Service Mesh for enhanced security and network segmentation of microservices applications. Combines Istio, Kiali (UI), and Jaeger (Tracing) projects.

OpenShift Serverless
- Integrated serverless, enabling scale-to-zero FaaS services and event sources - built on the Knative framework.
- Support for Azure Functions
- Integrated with Camel-k for rich set of initial event sources: HTTP, Kafka, AMQP
Enabling greater developer productivity

**CodeReady Workspaces**
Web-Based IDE (Eclipse Che), Collaborative Development, integrated with CI/CD.

**OpenShift ODO**
Advanced developer CLI

**OpenShift Plugins**
Integration plugins - VScode, Azure DevOps, Eclipse IDE, JetBrains

Red Hat Container Strategy Is Paying Off

Major market share developments in the first quarter of 2019 include:

- Red Hat OpenShift: 44%
- Docker: 23%
- Pivotal: 6%
- Rancher: 3%
- Canonical: 2%

Why customers choose Red Hat OpenShift

- Trusted enterprise Kubernetes
- Cloud-like experience everywhere
- Empowering developers to innovate

Open source innovation
THE CLOUD-NATIVE APP DEV CHALLENGE
84% of organizations have a multi-cloud strategy

With Red Hat your container application is portable

OpenShift offers one uniform environment across public and private cloud environments

Automated operations  Multi-tenant  Secure by default  Network traffic control  Over-the-air updates  Monitoring & chargeback  Pluggable architecture

BARE METAL, VSPHERE, RHV, OPENSTACK, AWS, AZURE, GOOGLE, IBM Cloud
OpenShift 4 Platform

- **CLUSTER SERVICES**
  - Metrics, Chargeback, Registry, Logging

- **APPLICATION SERVICES**
  - Middleware, Service Mesh, Functions, ISV

- **DEVELOPER SERVICES**
  - Dev Tools, Automated Builds, CI/CD, IDE

**AUTOMATED OPERATIONS**

**KUBERNETES**

**Red Hat Enterprise Linux or RHEL CoreOS**

Best IT Ops Experience

CaaS ↔ PaaS ↔ FaaS

Best Developer Experience
With OpenShift you can deliver all your applications in a whole new way.
Amsterdam Airport Schiphol flies to the Cloud with Red Hat OpenShift

Amsterdam Airport Schiphol, Europe’s fourth-busiest airport, wanted to improve its passenger experience and become the best digital airport. To support this shift, it decided to migrate several of its IT systems to the cloud to become more flexible, secure, and efficient.

“We are shifting to working in agile, dedicated teams with a lot of autonomy. From an infrastructure perspective, we would like to stay in control, but we want to let other teams make their own choices within that framework. Red Hat OpenShift helps us do so.”

“Red Hat OpenShift Container Platform as truly stolen my heart. It is innovative and lets us deploy quickly and easily control our containers.”
More than 1,000 OpenShift customers
One Platform, Flexible Consumption Models
