DevOps - The Red Hat Way

Roei Goldenberg
Consultant & Cloud expert/*matrix* 

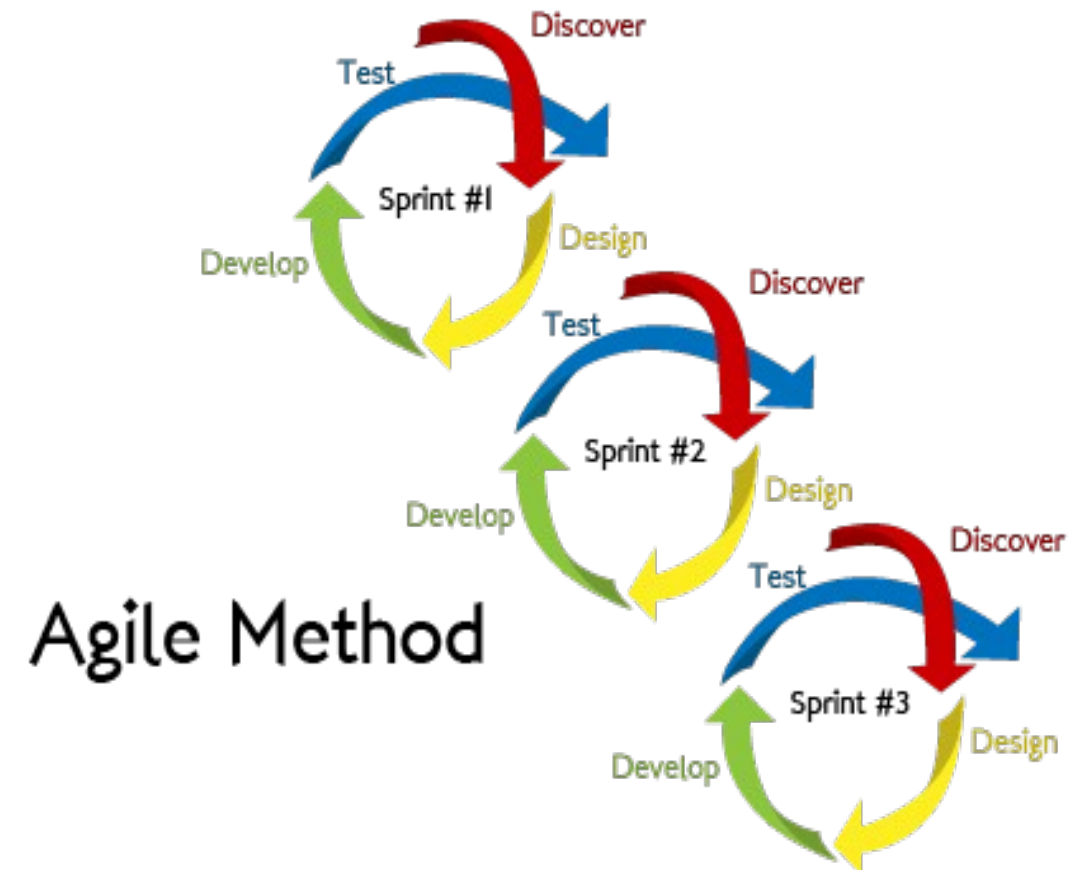

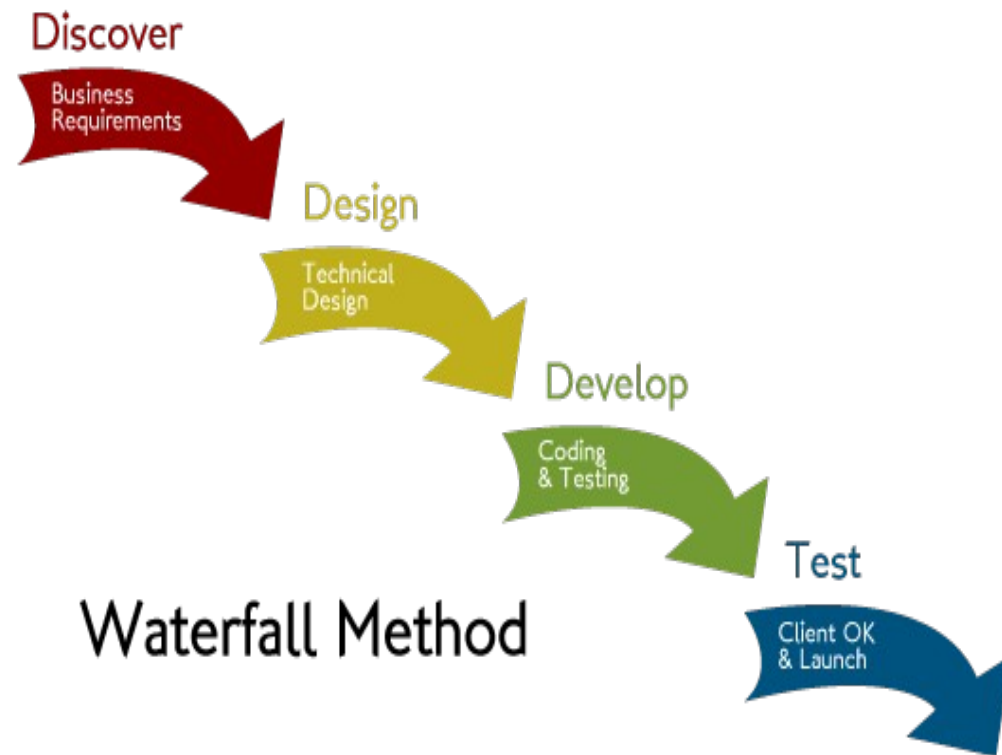

roeigo@matrix.co.il

So what is DevOps?

DevOps - (a clipped compound of "development" and "operations") is a software development method that stresses *communication, collaboration, integration, automation*, and measurement of cooperation between software *developers* and other *information-technology (IT) professionals*.

DevOps demands Agile!

IT OPS IS UNDER PRESSURE

ENVIRONMENT IS OUT OF CONTROL

DevApps – Develop and Deploy Cloud Applications.

What DevApps needs?!

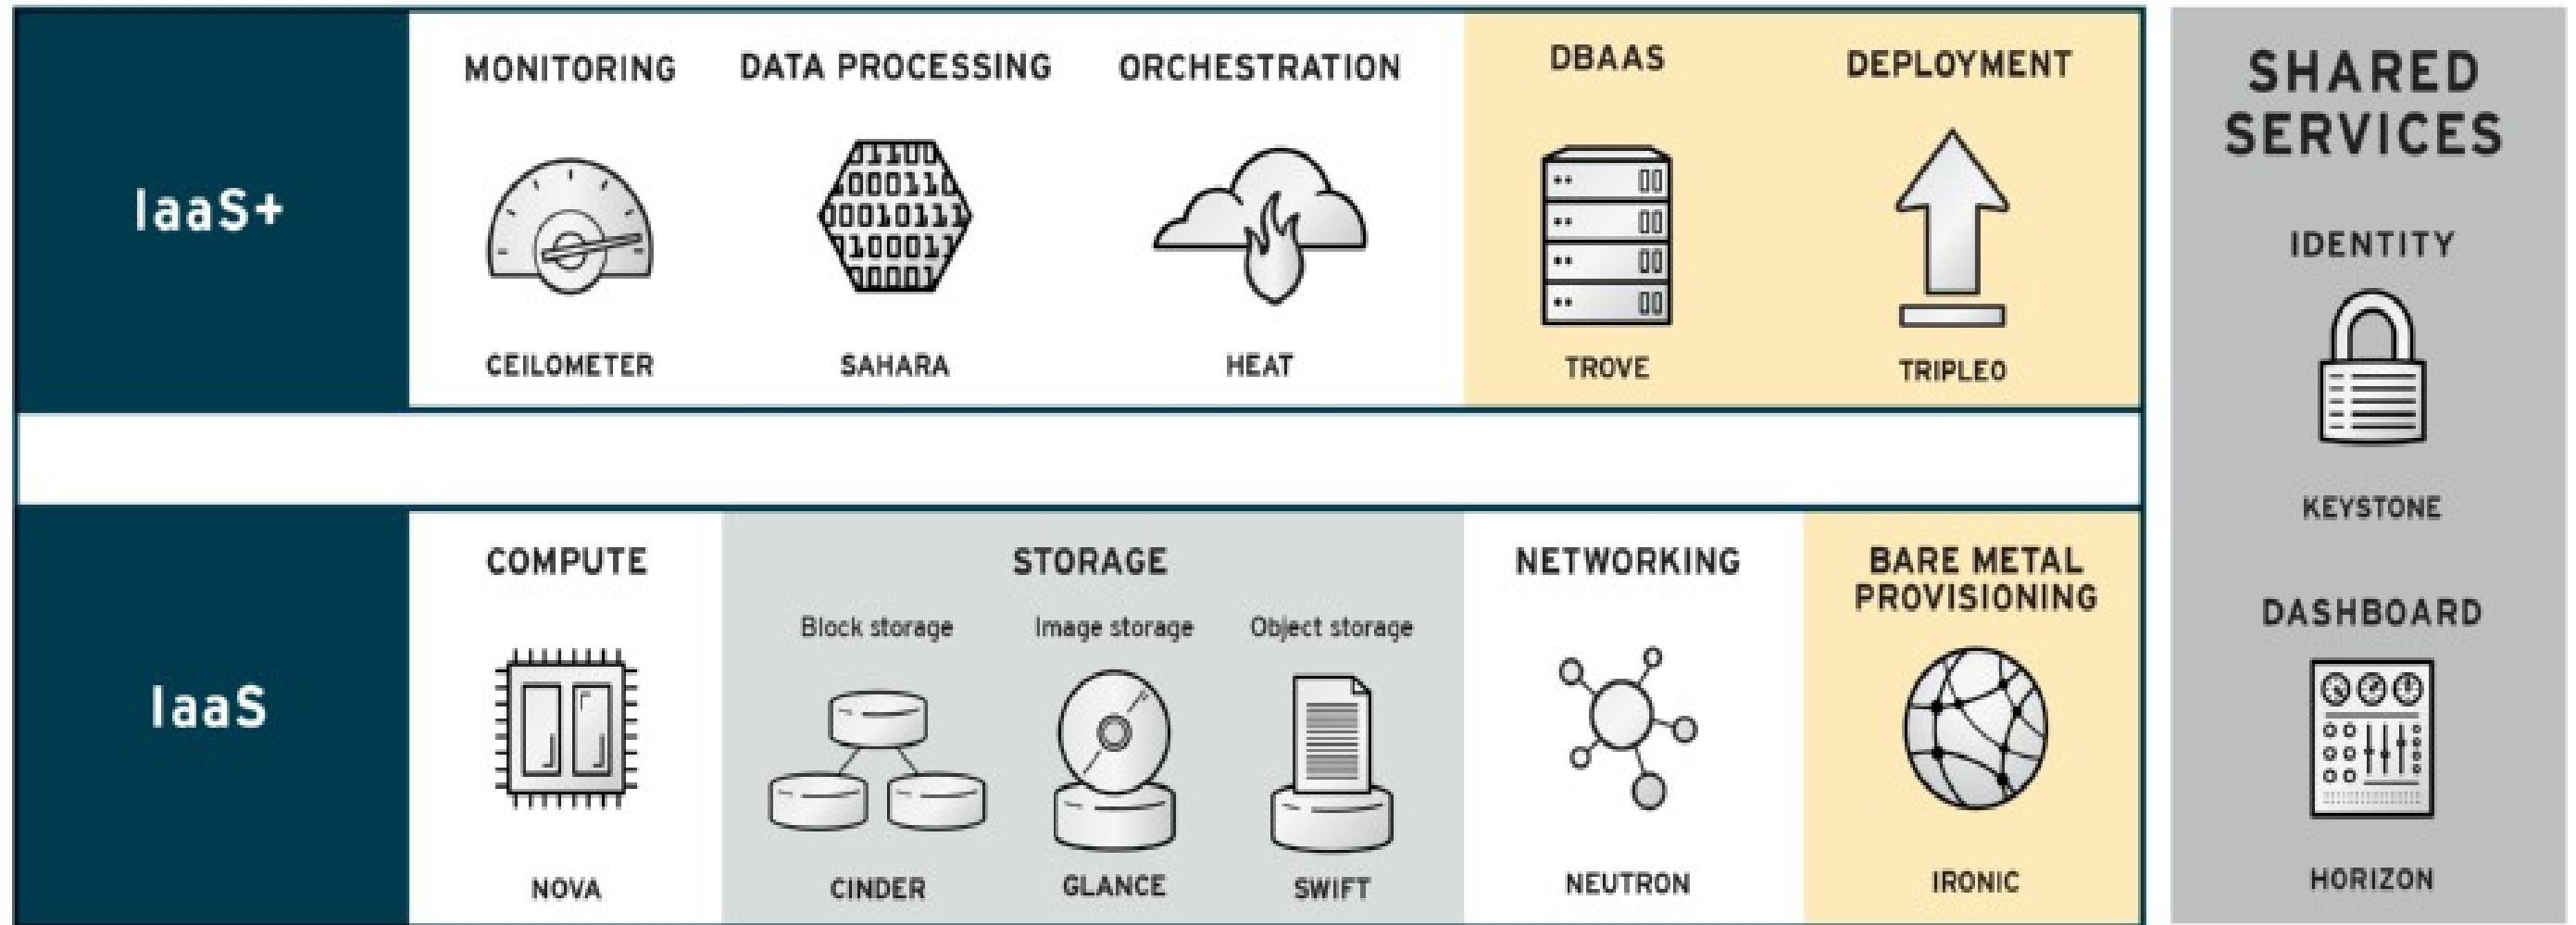

- Faster time to Market.
- Needs to work with agile methodology.
- Continues delivery of services.
- Rolling updates.
- Automation – of testing, deployment, scaling and DR.
- Competitive edge via technology.
- Scalability - of both the infrastructure and the application.
- Stable and robust infrastructure designed to fail.

How to do it with Red Hat!?

Most stable and reliable Linux Distribution in the world

Enjoy the power of Openstack in Enterprise level

RED HAT ENTERPRISE LINUX

RHEL-OSP – The Infrastructure for DevOps

- APIs that allows **automation**.
- Heat enables **complex provisioning**.
- Software defined DC allows **control** of all the **Application needs**.
- Agile infrastructure is **the base of being Agile!**
- Lack of persistency **makes you more agile!**
- Operations Personnel have to be familiar with all Data Center components which **increases cooperation**.

Openshift Enterprise – harness PaaS agility for bigger competitive edge

docker

OPENSIFT[®]
ENTERPRISE

by Red Hat[®]

kubernetes

Openshift enterprise – how application born!

- Developers enjoy **platform self service portal**.
- Supports diversity of **platform technologies**.
- Docker containers technology makes **upgrades and agile development easier then ever**.
- **Integration** with 3rd party such has **Jenkins** and **maven** allows implementing **automation processes** that increase **agility**.

CloudForms – Your Data Center Mission control!

CloudForms - run the show from a single pane of glass

- **Monitor, Management and Control** of the entire Data Center enables advanced **automation**.
- Customized central **self service portal**.
- **Integration** with other management and control platforms.

Conclusion

It's the Red Hat Story
