

Accelerate migration & drive innovations with Red Hat solutions for SAP

September 2018

Red Hat & SAP alignment

SAPs Key Offerings

Red Hat Value

... delivered by

Red Hat Offerings

SAP HANA

Making the **Datacenter**
efficient

automate manual tasks and speed up
deployment and changes. Avoid errors and
downtime with predictive analytics

RHEL
Insights
RHV

SAP S/4 HANA

Making **Hybrid IT**
simple

providing hybrid cloud management with
governance and policy based control, enabling
e.g. self-service functionalities, chargeback, etc.

Ansible
Cloudforms

SAP Leonardo

Powering **Intelligent**
Edge

integrating non-SAP solutions and sources and
unlock the value of enterprise data

Fuse
Decision
Manager

SAP Data Hub

Enabling **new business**
insights from Big Data

streamline development, modernization and
delivery of SAP extensions with container
technology and microservices

Openshift

Accelerate migration & drive innovations

Speed up your S/4 HANA migration

Increase data center efficiency

Make hybrid IT simple

Power the intelligent edge

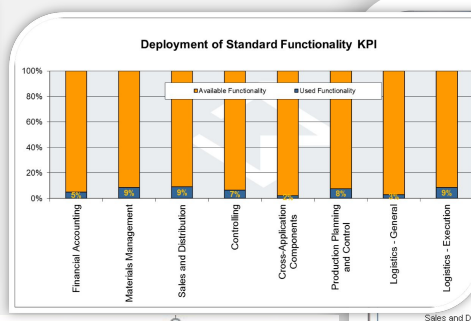

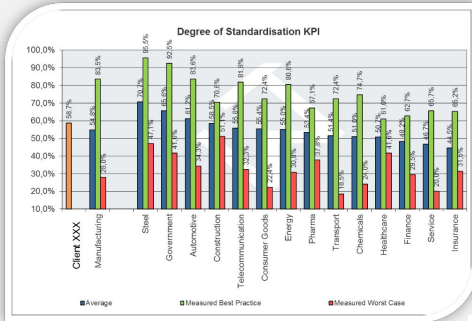

Enable new business insights

TYPICAL CHALLENGES - PROCESS & TECHNOLOGIES

From mature SAP landscape to Digital Excellence - But how?

Results are mix of executive overview and detailed data

Number of Sales Order Documents: 4.278.185

- Existing Order Types: 639
- Used Order Types: 268
- Y/Z-Order Types used: 268

Transaction	Description	Dialogs
CK13	Anzeigen Erzeugniskalkulation	189
CK13N	Anzeigen Materialkalkulation	27.731
CN43	Übersicht PSP-Elemente	6
CN43N	Übersicht PSP-Elemente	187
CO11	Erfassen Lohn-Rückmeldeschein	384.397
CO11N	Einbilderfassung Rückmeldung	15
CO16	Rückm.: Nachbearbeitung Fehlersätze	32
CO16N	Nachbearbeitung Rückmeldung	4
CV01	Anlegen Dokumentinfosatz	23
CV01N	Dokumentanlegen	145.742
CV02	Ändern Dokumentinfosatz	24
CV02N	Dokumentändern	36.488
CV03	Anzeigen Dokumentinfosatz	10
CV03N	Dokumentanzeigen	208.577

Calculation of Yearly Savings in Person Days (PD)

391	used CC no longer needed x	2 PD Effort	=	783 PD Effort per Year
3131	unused CC no longer needed x	0,125 PD Effort	=	391 PD Effort per Year
		Sum Efforts		1174 PD Effort per Year that could be saved!

Transactions	Standard	Descr	Sum Dialogs
0184	Standard	0184 Lieferungspositionstypenfindung	10
0184	Standard	No report title available	2.434.851
0184	Standard	Generic table display	3
0184	Standard	Generic table display	2
0184	Standard	Generic table display	5
0184	Standard	Generic table display	2
0184	Standard	Generic table display	2

Value Proposition

- neutral, facts based & automated assessment
 - Transparency
- common understanding between all stakeholders
 - shorten the migration by hundreds of days
 - reduce work on legacy custom code
 - prepare for modernized technologies around HANA Architecture
- has been proven to work by 1600 assessments

Best Practice - recommended by SAP

Accelerate migration & drive innovations

Speed up your S/4 HANA migration

Increase data center efficiency

Make hybrid IT simple

Power the intelligent edge

Enable new business insights

Signs of Potential Efficiency Improvements

“Applications and infrastructure are changing too fast.”

“I can’t keep up with patching and security advisories.”

“Our network operations team is stretched thin with constant configuration changes.”

“We need better audit and change control to protect our business.”

“Existing IT ops staff and processes can’t keep up with the scale of digital business.”

SAP HANA standard installation process

HARDWARE > LINUX (OS) > SAP HANA > VALIDATION > MAINTENANCE

▶ On Site construction

▶ Installation & Configuration

▶ Installation & Configuration

▶ Validation & Customization

▶ Maintenance & Updates

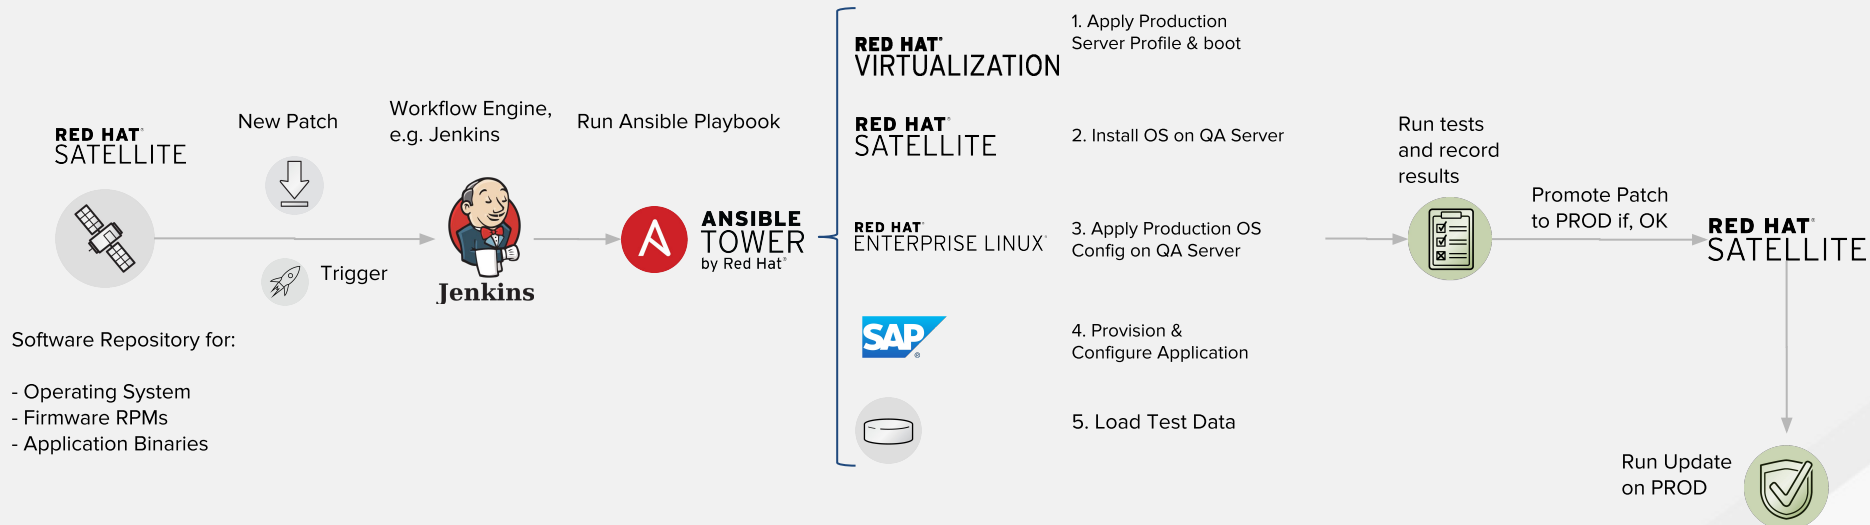

Individually for each server and environment!

SAP HANA **optimized** installation process with Ansible

Automation for the whole environment

Use Case: reduce risk of patching SAP landscapes

Red Hat Insights: proactive resolution

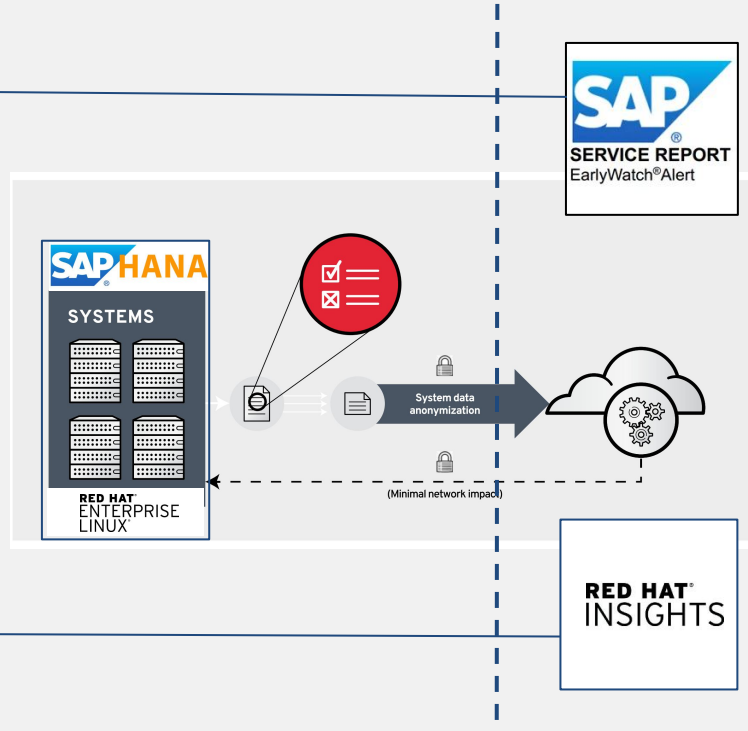

SAP Base Admin

Administrators are proactively informed on possible future impacts

Infrastructure Admin

SAP EARLY WATCH

- proactive application monitoring
- top down view
- ML in SAP datacenter

Red Hat Insights

- proactive infrastructure monitoring
- bottom up view
- ML in Red Hat datacenter

Accelerate migration & drive innovations

Speed up your S/4 HANA migration

Increase data center efficiency

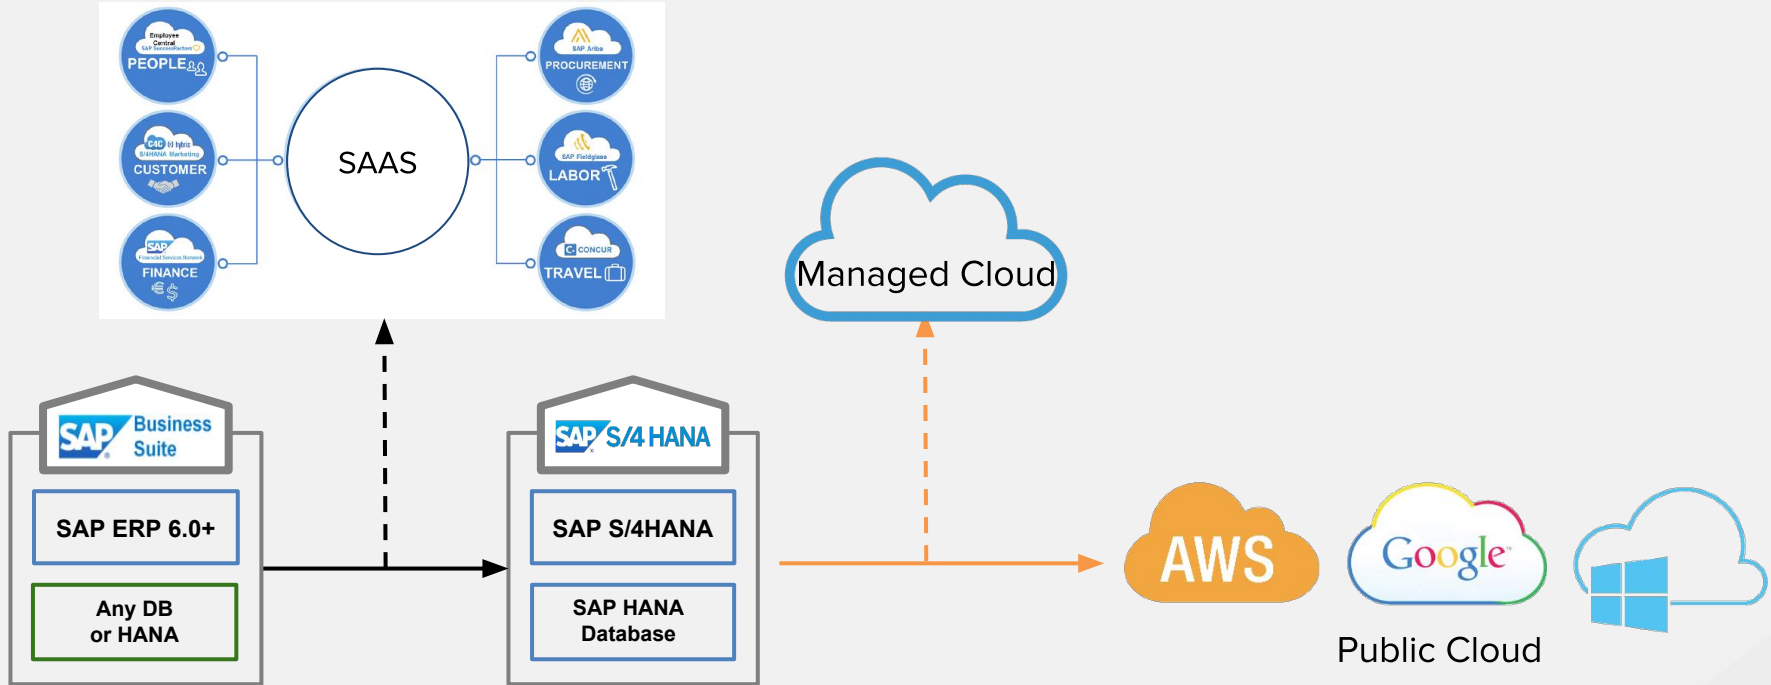

Make hybrid IT simple

Power the intelligent edge

Enable new business insights

100% of SAP Customers will be hybrid by 2025

What will happen to SAP ERP?

Red Hat CloudForms & Red Hat Ansible

Accelerate migration & drive innovations

Speed up your S/4 HANA migration

Increase data center efficiency

Make hybrid IT simple

Power the intelligent edge

Enable new business insights

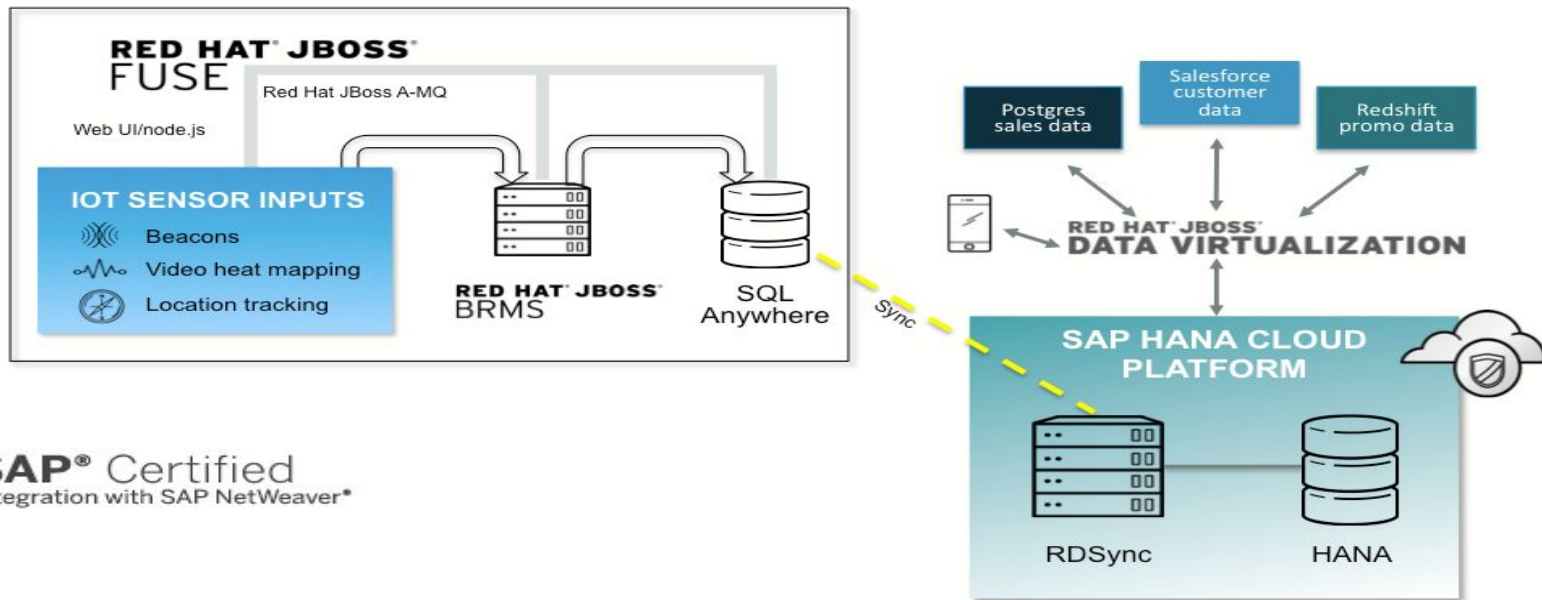

Another example to see how you could obtain advantage...

A retailer wants to:

- Identify high-value customers in the store
- Influence customer response **in real time**
- Use real-time data combined with historical customer data to increase revenue/margin from customers
- Get valuable insight in real time and make decisions even when running in disconnected mode from the center
- Maintain low-cost software-defined video storage at the store

IoT solution built with SAP

SAP® Certified
Integration with SAP NetWeaver®

<https://www.redhat.com/en/about/videos/iot-and-big-data-red-hat-jboss-middleware-and-sap-hana>
<https://vimeo.com/184648850>

Value Proposition

- Bridge the gap between IT and OT by driving intelligence outside of the data center
- enabling secure collection, transformation, and processing of data generated from any connected IoT device
- Transforming device data into actionable information

Accelerate migration & drive innovations

Speed up your S/4 HANA migration

Increase data center efficiency

Make hybrid IT simple

Power the intelligent edge

Enable new business insights

A global study of enterprise data challenges and solutions

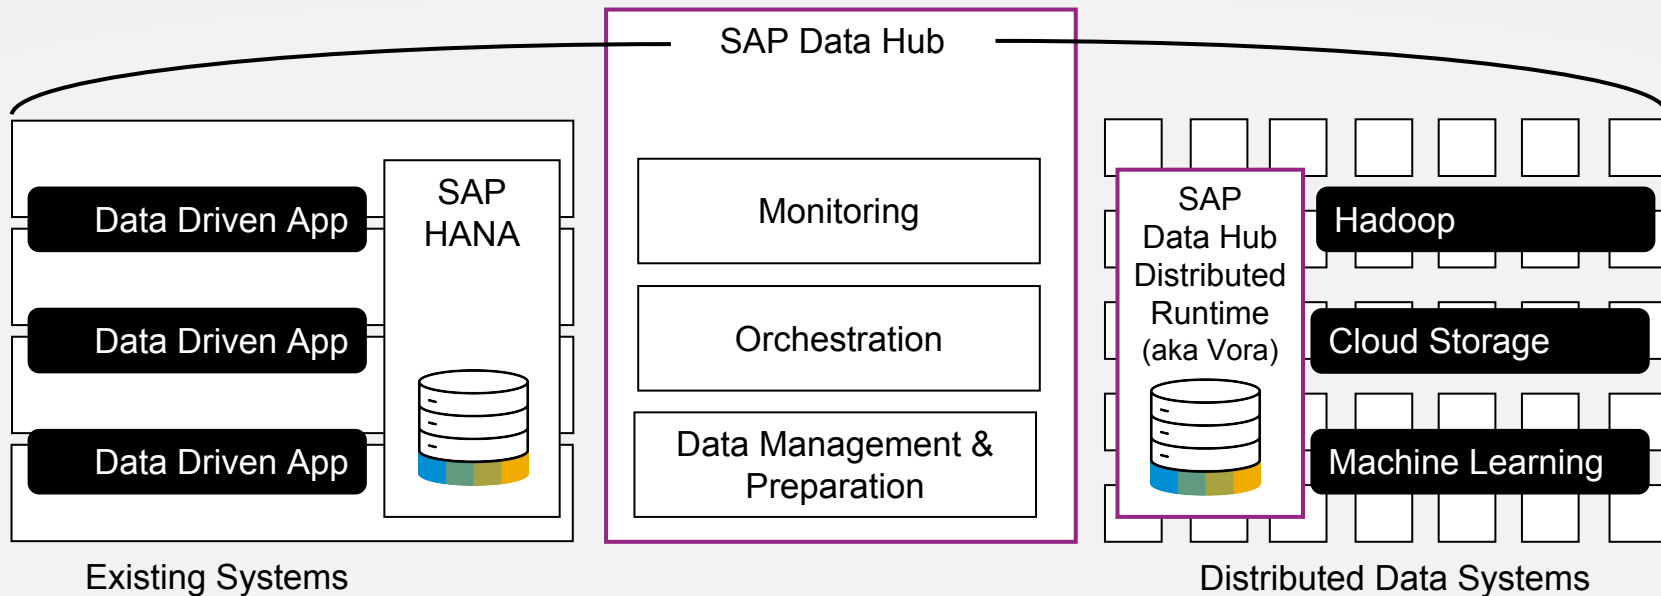

Businesses leaders continue to believe that fragmented, siloed IT environments block their ability to make informed business decisions

Data 2020: State of Big Data Study

A global study of enterprise data challenges and solutions

- **74 %** of IT leaders said their data landscape is so complex that it limits agility
- **86 %** said they were not getting the most out of their data.
- **50%** believe that data is inaccessible to a wide variety of business stakeholders

Unify data silos with SAP Data Hub powered by OpenShift

Red Hat Enterprise Linux for SAP Solutions

Red Hat OpenShift Container Platform

Red Hat Enterprise Linux

ON-PREMISE | CLOUD | HYBRID

Addressing top challenges of running SAP Vora containers at scale

**OPERATIONAL
EFFICIENCY**

**SERVICE
HEALTH**

**SECURITY
& COMPLIANCE**

**FINANCIAL
MANAGEMENT**

How SAP and Red Hat deliver better business outcomes

Your next project

Making HANA the digital core

1

SAP S/4 HANA

Managing hybrid IT.

Your choice of where to deploy.

2

Private Cloud, Managed Service Public Cloud Infrastructure-as-a-Service Public Cloud, Pay-as-you-go

Gaining insights from a universe of connected devices

3

SAP Leonardo

4

Unleashing the value of your enterprise data

SAP Data Hub

Business Outcomes

- **Fastest Time to Value:**
 - Speed-up deployments
 - Achieve your SLAs: avoid errors and down-time, reduce TCO
 - Increase flexibility: provide hybrid cloud and self-service
- **Unleash the value in enterprise data:**
 - Integration between SAP and non-SAP solutions and sources: *make HANA the digital core*
 - Integrate your non-SAP data with SAP DataHub
- **Accelerate Innovation:**
 - cut down time and cost of S/4HANA migration up to 60%
 - Deliver faster with containers and micro services, streamline development, including SAP custom code
 - faster access to infrastructure resources: hybrid cloud and self-service functionalities
