AGENDA

OpenShift …. There's a pipeline for that

DevOps
Agile
MicroServices
My Thoughts
OpenShift Is An Enabler
Show me something
Take Away

DevOps

** DevOps is a term used to describe a series of methods and practices used to allow the increased collaboration, communication and agility of different aspects of IT based functions such as Development, Testing and Operations ***

Agile

A term used to describe software deployment methodologies based around an iterative approach.

SCRUM

Deployment / Deliver
Testing
Feedback
Integration

MicroServices

An Architecture of which applications are deployed as singular modular services

Single Repo Principle

Independant in an autonomous fashion

Lightweight

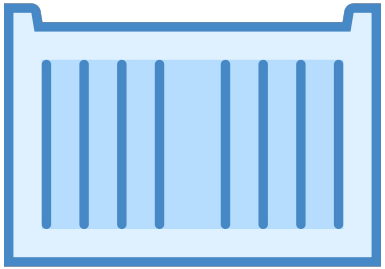
Performs a single service

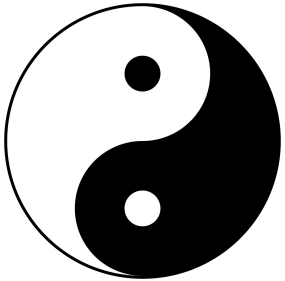
Stateless

My Fundamental Thoughts

Technology is a huge part of “buzzword Bingo” but culture plays a huge part

open source



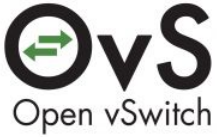


OPENSHIFT

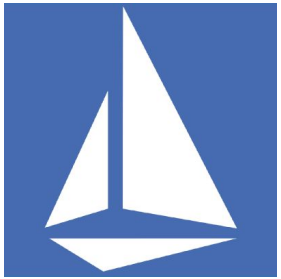
OpenShift - It Enables

- Microservices
- Legacy to modern app
- Agility
- Automation
- DevOps
- Catalyst for change

OpenShift - DIY'Not



cri-o



OpenShift - Really that good?

Show me something

Take Away
