Existing Security & Compliance Technical Debt

1. Running internal vulnerability scans

2. Addressing “document sprawl”
New Technologies...Old Compliance Requirements

1. Traditional Server Maintenance for Immutable Infrastructure

2. Physical Access Log requests for Cloud based customers
Maturing the Vulnerability Management Life Cycle

1. More specialized people

2. Small group with specialized focus
Maintaining Compliance and Governance in the Hybrid Cloud

Managing Risk while Reducing Friction

1. Streamline compliance tasks to be AGILE

2. Allow engineers to focus on key issues vs administrative tasks
