What's New in Commvault® Cloud

Total resilience. No excuses

Andrea Calamata

Field Sales Engineer, Commvault

EVOLVING OUR POSITION

FROM

Modern Data Protection

TO

The Platform for Cyber Resilience

- ▶ Proactive, predictive, autonomous
- ▶ Speaks the language of the CISO
- ▶ Cyber resilience is business resilience

The best security

Unified Management
Data Security Posture Mgmt

The most intelligence

AI-Driven Threat Detection
Gen-AI Assistant

The fastest recovery

Cleanroom Recovery
Cloudburst Recovery

What's new

SECURITY

The industry's best data security.

UNIFIED MANAGEMENT

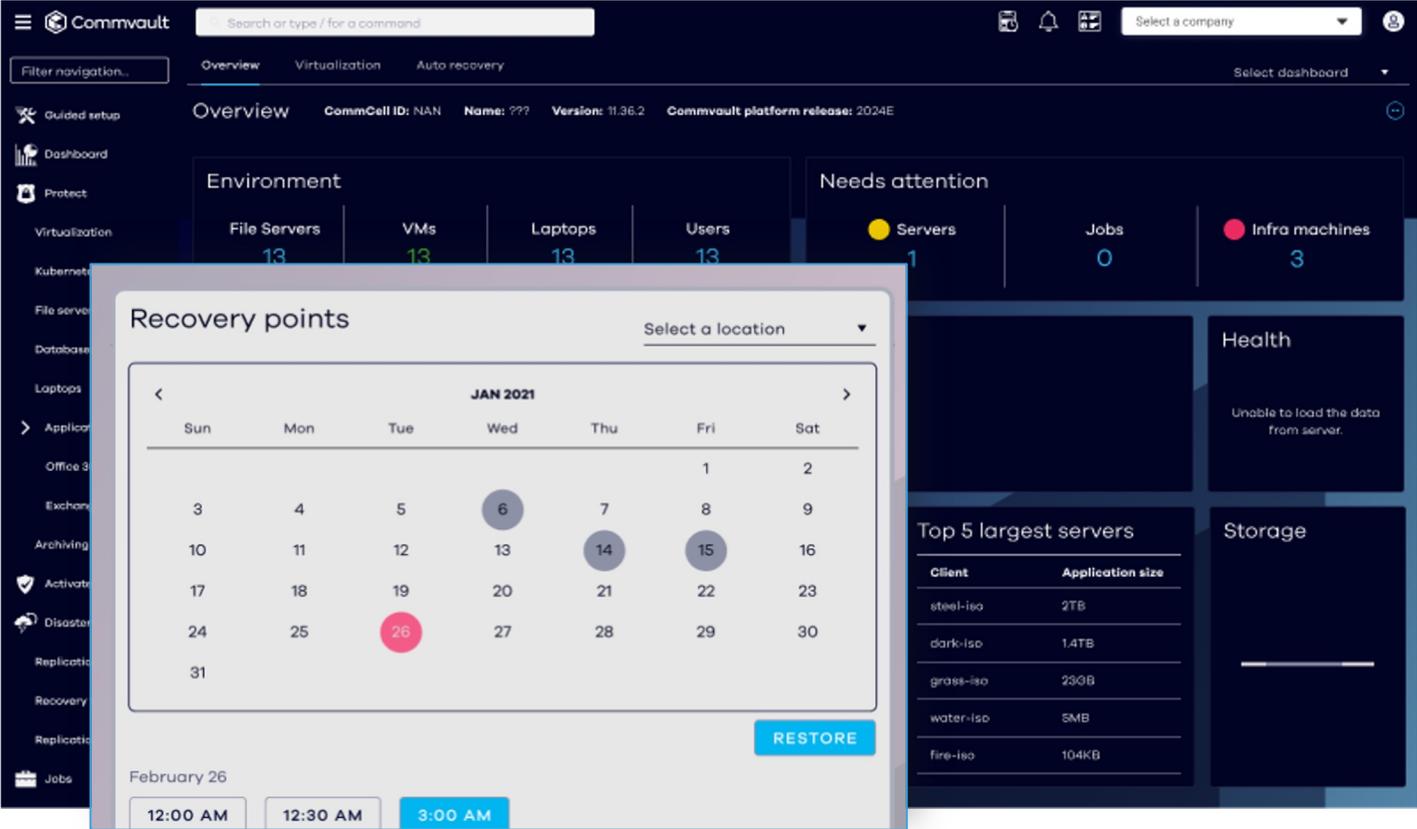

A single way to see and govern your cyber resilience across all hybrid workloads

RISK GOVERNANCE

Categorize your data & continually scan for compliance to ensure the strongest security posture

INTELLIGENCE

RECOVERY

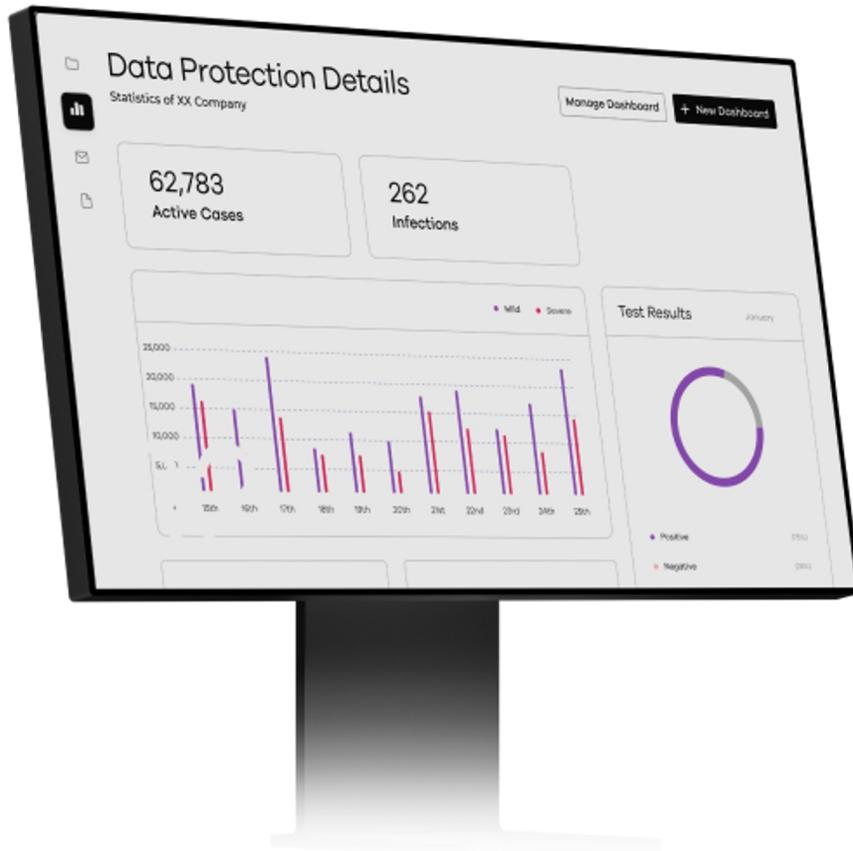

What's new

SECURITY

INTELLIGENCE

RECOVERY

Powered by advanced AI to strengthen resilience.

FIGHT AI WITH AI

AI-driven ransomware to identify zero-day and AI-driven malware threats that have already impacted backups

PLAIN LANGUAGE. POWERFUL RESULTS.

Leverage the category's only AI co-pilot to:

- Generate API code and workflows
- Find and fix faster
- Gain real-time analysis and report digests
- Ensure data shared in Data Lakes is safe to share

What's new

SECURITY

INTELLIGENCE

RECOVERY

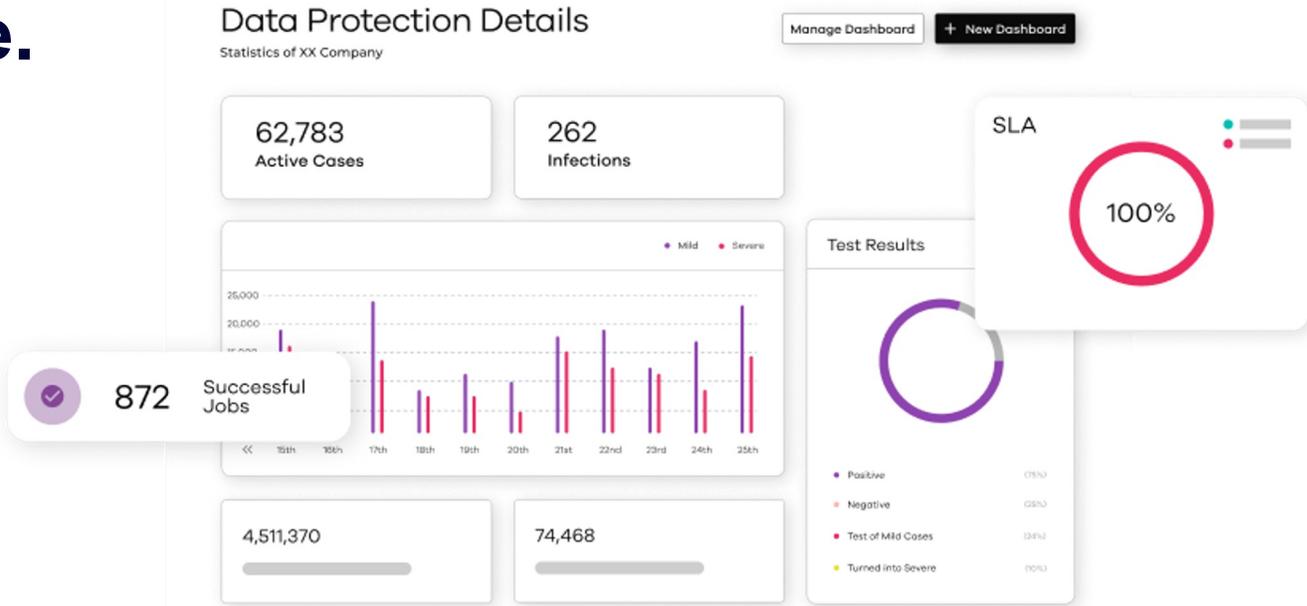

Rapid, frictionless, reliable recovery is the best defense.

CLEANROOM RECOVERY

Providing a testing ground for a rapid, frictionless, and reliable recovery to a cleanroom in the cloud

CLOUDBURST RECOVERY

Leverage infrastructure-as-code and cloud-scaling to recover data from anywhere to anywhere — at scale

The New AI Features Help Commvault Users To Troubleshoot and Automate Operations

Root cause & Resolve

Automated troubleshooting

Objective

Troubleshoot & resolve product issues, quickly and automatically

Tools

Azure OpenAI, ChromaDB, WebApp

Code Assistant

Automated API generation

Objective

Coding with Commvault APIs should be easy, even for the least technical

Tools

Azure OpenAI, RAG, ReAct

Documentation Search

Interactive documentation

Objective

Customer uses chat bot for searching documentation with feedback built-in

Tools

Azure OpenAI, RAG, ChromaDB

Code Assist

BUSINESS CHALLENGE

- Commvault offers an extensive and rich set of REST APIs for automation (more than 2800 of them)
- Discovering right API along with appropriate parameters can be time consuming
- Simplifying this experience promotes more automation allowing users to customize Commvault to their needs

CUSTOMER BENEFITS

Who

IT/Backup Admins

Professional Services

Why

- Accelerate automation by making coding with Commvault easy
- Make automation easy even for novice users not familiar with Commvault APIs

OUR SOLUTION

- Code generation tool that users can interact with in human language
- Identify right APIs with right inputs with the right order of execution based on command text

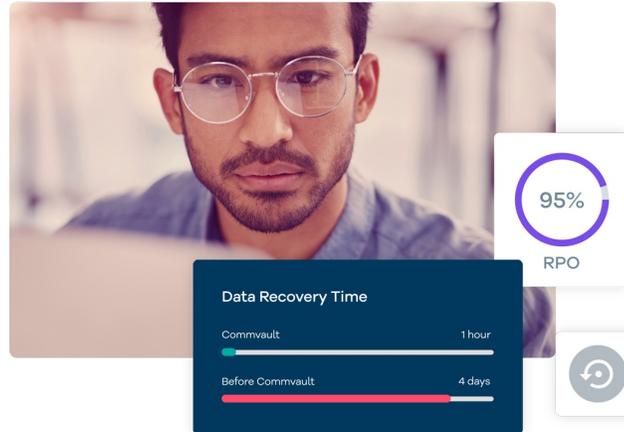

Global Management

CUSTOMER CHALLENGES

Distributed & hybrid environments are complex to manage

Maintaining consistent configurations across multiple deployments

Security posture across deployments

CUSTOMER BENEFITS

Who

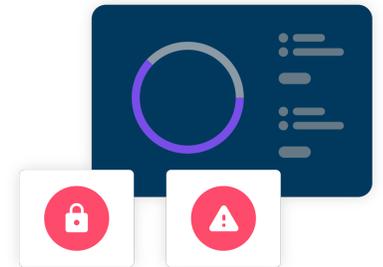

IT/Backup Admins, Sec Ops

Why

- Seamless switching between Global and Local Control Planes
- Policy based management of configurations across CommCells, Tenants and Companies
- Global entities such as Server Groups and Plans that can be automatically configured across multiple environments.

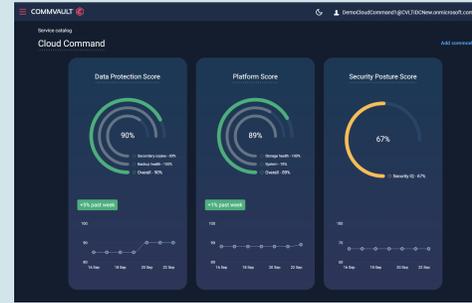

OUR SOLUTION

Global Management aims to reduce risk and simplify managing hybrid or distributed environments using policy-based management of configurations and entities across multiple environments

Commvault Cloud – Global Management

GLOBAL

Commvault Cloud (SaaS)

- Global Visibility across Operations, Platform and Security
- Quickly move between Environments
- Global, policy-based management of Plans, Groups and Roles

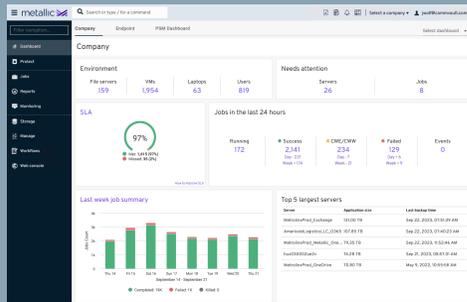

System Metrics

System Metrics

Global Policies

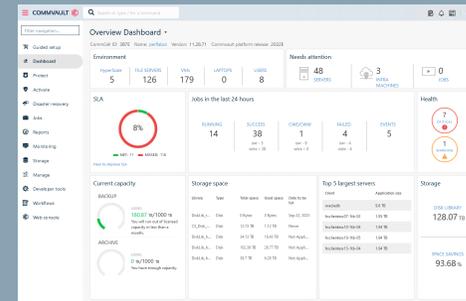

Command Center (SaaS)

- Job Management
- Workload Configuration & Operations
- System Maintenance

Command Center (Software/HSX)

- Job Management
- Workload Configuration & Operations
- System Maintenance

LOCAL

One platform. All workloads. Single Pane of Glass.
