Focus on your Business Assets , mitigating Liabilities

"How Offloading Platform Management Drives Innovation and Speed"

Georgios Pagiatakis - UK SSA gpagiata@redhat.com

“射有似乎君子，失诸正鹄，反求诸其身”

“ When it is obvious that the goals cannot be reached, don't adjust the goals, adjust the action steps ”

Assets (appreciating) and Liabilities (or depreciating assets)

What drives value in Digital Businesses - can be considered an asset?

- **Innovative product offerings**
- Customer relationships and satisfaction
- Efficient workflows and processes
- **Digital Applications**
- Brand value and reputation
- Intellectual property (IP) and data
- **Skilled and talented workforce utilized in the best way possible**
- **Ability to execute fast**

Speed as an asset

- **Speed** of development and delivery provides a competitive edge
- **Speed** to market is essential for customer satisfaction, competitive advantage leading to potential for business profitability

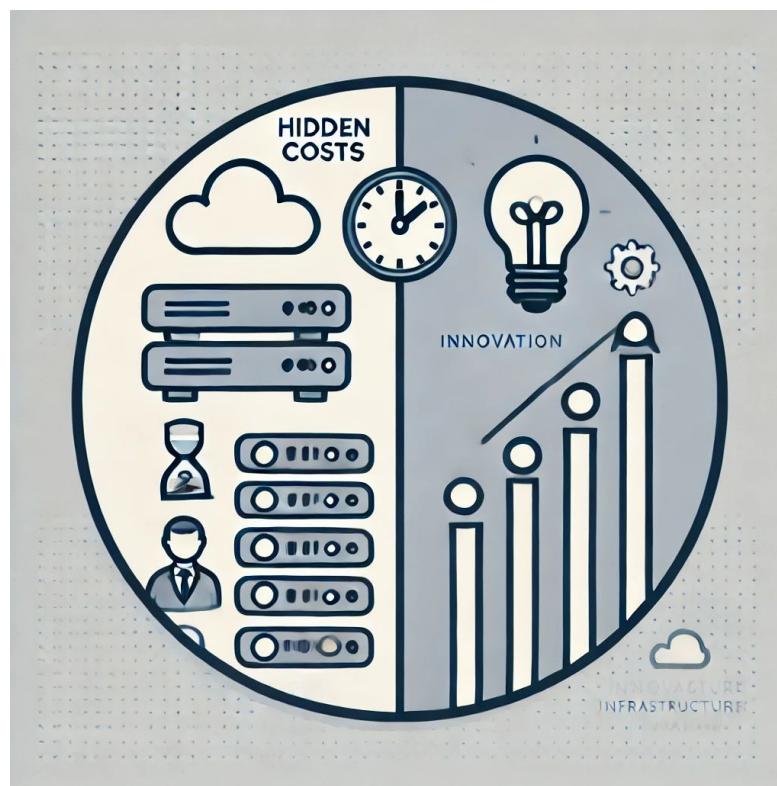

The “necessary ?” evil

- Technical debt from ageing systems
- **Hardware infrastructure and underlying platforms**
- **Platform Maintenance and operational costs**
- **Compliance and regulatory requirements**
- System downtime and reliability concerns
- Cybersecurity vulnerabilities
- **Vendor lock-in or dependency risks**
- **Skilled and talented workforce utilized in a non-efficient manner**

A few of The hidden "costs" of Focusing on Platforms maintenance

- Complexity and **Time** Consumption
- Maintenance of specialized skills
- Operation Downtime Risks
- Security and Compliance Risks

The Foundation of Modern Application Platforms

kubernetes

They promised you the future

“It’s the future!”

Everything was going to be solved

Scalability

Scale as you need, when you need

Portability

Once containerised, you can run your app anywhere!

High Availability

Automatically achieve HA via Orchestration systems

Improved utilisation

Reduce costs by accurately predicting usage

But they never promised simplicity

The evolving Cloud Native landscape...

CNCF Cloud Native Landscape
2020-05-05T22:49:53Z 8a2f76a

Overwhelmed? Please see the CNCF Trail Map. That and the interactive landscape are at l.cncf.io

Special

Cloud Native Landscape
This landscape is intended as a map through the previously uncharted terrain of cloud native technologies. There are many routes to deploying a cloud native application, with CNCF Projects representing a particularly well-traveled path.

Red Hat OpenShift : Build business value, not a technology platform

DIY Kubernetes-powered platform

Time and resources to integrate
10-20+ individual services

In house or multiple vendors for
ongoing maintenance and support

Reliance on one cloud or DIY
integration of multi cloud apps

Red Hat OpenShift

Turnkey application platform with
integrated services and tools

Kubernetes AND components
supported 100%

Consistent experience and choice
regardless of where you deploy

Red Hat OpenShift cloud services

A turnkey application platform with management and support from Red Hat and leading cloud providers

Further Accelerate time to value

Quickly build, deploy, and run applications that scale as needed.

Operational efficiency

Enhance operational consistency, efficiency and security with proactive management and support.

Focus on innovation

Simplify operations so your teams can refocus on innovation, not managing infrastructure.

Hybrid cloud flexibility

Deliver a consistent experience on premises and in the cloud.

Building an Application Platform on Public Clouds

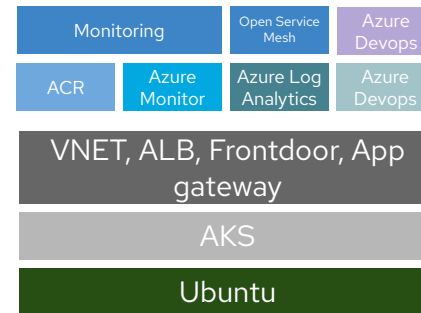

The required Parts

The AWS Car

The Azure Car

The GCP Car

3 Different Cars

- Different component versions
- Different life cycles
- Different support models
- Different developer and ops tooling

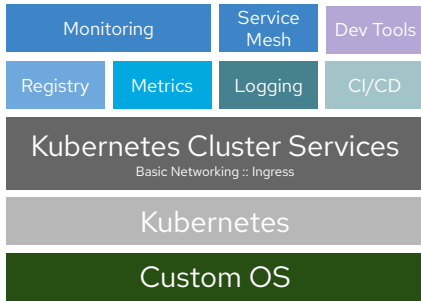

3 different drivers and pit crews needed

OpenShift differentiator with an analogy

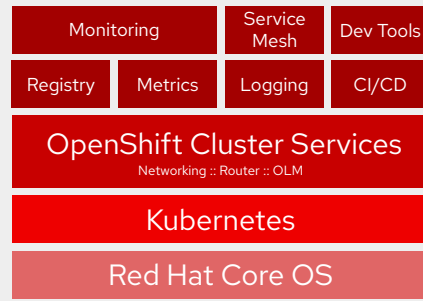

The Parts

xKS + 'native' services

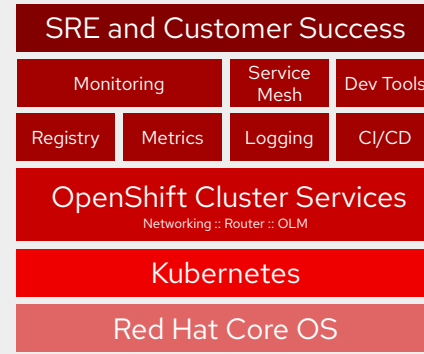

The Assembled Car

- Application Platform -
Self-managed Red Hat OpenShift

The Car & Pit Crew

- Turnkey Application Platform -
Red Hat OpenShift cloud services

From Self - Managed to Fully Managed clusters with Openshift Cloud Services

Responsibilities	
User management	Customer
Project and quota management	Customer
Application lifecycle	Customer
Cluster creation	Cloud Provider and Red Hat
Cluster management	Cloud Provider and Red Hat
Monitoring and logging	Cloud Provider and Red Hat
Network configuration	Cloud Provider and Red Hat
Software and security updates	Cloud Provider and Red Hat
Platform support	Cloud Provider and Red Hat

Let **Cloud Provider** and **Red Hat**

Manage all your clusters.

Secure your nodes.

Monitor and operate your VMs.

Manage environment patches.

Customer Cloud Provider and Red Hat

OpenShift Cloud Services - Some Fast Facts

Faster Time To Development

- Clusters that deploy easily in ~ **45 minutes!**
- Less time on infrastructure, more time spend on your applications
- Fully HA Standard Arch

Reduced Complexity

- **Fully** monitored clusters, managed and updated from infrastructure to daily operations
- Monitoring, logging, networking, etc. included
- Flexible consumption-based pricing
- 24x7 support from industry leading SRE team with financially backed 99.95+ % SLAs

Integrated into the Cloud

- Native Integration with Azure Ecosystem and services
- Only company to offer managed Kubernetes on **all** major public clouds
- **Consistent** OpenShift experiences across clouds, with ability to do multi cloud.

Accelerating innovation

End-to-End support for your entire application platform

- ▶ OpenShift cloud services includes **full support for worker nodes**
 - Zero downtime upgrades,
 - proactive monitoring
 - automated patching
 - **Compliance and certifications** extend to worker nodes
- ▶ **99.95%** financially backed SLA
- ▶ **24x7 joint support** from Red Hat and cloud provider
- ▶ Automation and **Day 2 Operations** by global SREs

Speed wins the race ! The benefits of offloading platform maintenance..

- **Shortened** development lifecycle
- **Increased Operational Efficiency**
- Higher focus on innovation and revenue-generating activities
- Improved business efficiency at every angle and faster time-to-market
- Deploy **first**, not last

Improve focus, efficiency and productivity

Forrester Research: The Total Economic Impact™ of OpenShift cloud services

FORRESTER

50%

50% improvement in operational efficiency¹

468%

468% return on investment¹

65%

Shortened development cycle by 65%¹

“One of our pain points is we don’t want to do infrastructure. We just want to **focus on building great experiences**. We wanted to find somebody who could **manage this for us**, so we didn’t have to.”

Director for operations and infrastructure,
Telecom company

The Total Economic Impact™ Of Red Hat OpenShift Cloud Services

Cost Savings And Business Benefits
Enabled By Red Hat OpenShift Cloud Services
