Journey to automation
Nov 2022

STAR

- **SITUATION** : infrastructure automated by AWX - non production designed automation tool
- **TASK** : get AAA automation platform and related support
- **ACTION** : deployment POC of Red Hat Ansible Automation Platform 2
- **RESULT** : AAP in pre-production for linux infrastructure, multiple departments included or are plugin in the project – network, dba, observability, banking apps and more

Key decision points

- Red Hat Support
- Technology
- Scalability

Red Hat Support

- Architecture design assessment
- Deployment assistance
- Bug report/escalation
- Support for production usage
- Technical documentation

Technology

- Red Hat deployment tools
- Ansible Meshing Network
- Lifecycle

Scalability

- Ansible Meshing Network load balance
- Clusterization
- Bullet proof infrastructure

Next steps

- JIRA integration – automate significant part of service catalog
- Governance handover on parts of infrastructure for interested teams

THANK YOU
