About me

Traditional

Configuring systems

- Bootstrap
- Java
- Tomcat

Traditional

Benefit over shell scripts

- Easier to test
- More structured
- Idempotent

Security

- Patching
- CVE (testing/fixing)

Scripts

- ansible-generator
- gitlab-settings

Terraform

- Terraform for IaC
- Ansible instance configuration
- Ansible for orchestration

Terraform

- Terraform drops an inventory
- Ansible reads Terraform output

Others

- Ansible CMDB
- Bios updates

Conclusion

- Ansible roles as tools in my toolbox
- Ansible shines with structured data
- Ansible is “low-code”
- Ansible structures my world
